- The Hyundai HY10500 is a single phase diesel generator with a maximum output of 11kVA. Designed for domestic or professional use, the HY10500 is powered by a Hyundai diesel engine and is equipped an AVR alternator to produce clean energy. This means that any sensitive electronic equipment, such as televisions, PCs and laptops, can safely be powered by the HY10500.
- The HY10500 can be started manually by using the key, or connected to an ATS (Automatic Transfer Switch) system. An ATS system will automatically detect a loss of power from the mains, turn your HY10500 on automatically, and then turn it off again when power returns from the mains. Housed in a weather-proof "silenced" canopy, the HY10500 produces only 70dBA @ 7 metres which makes it a quiet standby generator which won't interrupt you at home or work.
